And I want to make the card views to have rounded corners. SOLVED! Solution: remove the background color from the layout and set it on the card view itself as `app:cardBackgroundColor="# the color you want"` and make sure you have the following dependency implementation `'com.google.android.material:material:1.1.0'` Those should do the job. Is it because of the layout inside the CardView? Update! --> Added extra information I have the following activity in which I try to make 3 card views containing information. I use the `app:cardCornerRadius="8dp"` but it's not showing any result, the corners still do not look round. Thank you! Below you can see the XML file
